SKILLS

- Swift / SwiftUI
- Kotlin / Jetpack Compose
- React Native
- TypeScript
- Mobile CI/CD (Bitrise, Fastlane)
- Performance Profiling (Instruments, Perfetto)
- Crashlytics / Sentry
- GraphQL / REST
- App Store / Play Store Release Mgmt
- Mobile Accessibility

EDUCATION

Bachelor of Science

Sep 2012 - May 2016

University of California, Berkeley — EECS

Berkeley, CA

Computer Science

GPA: 3.7/4.0

LANGUAGES

English	Native
Hindi	Native
Gujarati	Fluent
Spanish	Conversational

SUMMARY

Mobile App Developer with 7 years shipping React Native, Swift, and Kotlin apps at Airbnb and Spotify. Released 18 production features to 90M+ users; cut crash-free rate from 99.1% to 99.94% and reduced cold-start time 41% on iOS. Comfortable across the modern mobile stack (SwiftUI, Jetpack Compose, KMP) and the release pipeline (Fastlane, Bitrise, App Store / Play Store).

EXPERIENCE

Senior Mobile App Developer

Jul 2022 - Present

Airbnb — Mountain View, CA

Owns the host listing flow across iOS and Android.

- Cut iOS cold-start from 2.8s to 1.65s by deferring non-critical initialization and modularizing 14 frameworks.
- Lifted crash-free sessions from 99.1% to 99.94% across 41M monthly devices via stricter typed bridges and instrumentation.
- Shipped a React Native rewrite of the host calendar that grew daily host-edit conversion 11% on Android.
- Mentored 3 mid-level mobile engineers; reviewed 420+ PRs in the past 12 months across iOS and Android.
- Owned the Bitrise + Fastlane release pipeline; cut p95 release-build time from 38 minutes to 16.

Mobile Engineer

Apr 2018 - Jun 2022

Spotify — New York, NY

Now Playing and Discover features on iOS and Android.

- Built a Kotlin Multiplatform module shared by iOS and Android, removing 8,400 LOC of duplicate code.
- Reduced episode-page TTI 32% by introducing prefetching and image cache tuning.
- Co-authored the Spotify mobile A11y rubric used across 14 squads; lifted internal accessibility audit score from 71 to 91.
- Promoted from Mid to Senior in 22 months on the strength of two cross-team architecture proposals adopted by the platform team.

Junior Mobile Developer

Aug 2016 - Mar 2018

Lyft — San Francisco, CA

Driver app team — navigation and earnings surfaces.

- Built the driver earnings breakdown screen used by 1.2M weekly active drivers.
- Cut Sentry-tracked NPE crashes by 47% on the driver Android app via null-safety refactor.
- Earned the 2017 Driver-App Team "Best New Joiner" award.

CERTIFICATES

Google Associate Android Developer

May 2024

Google

Validates skills building Android apps with Kotlin and Compose.

Apple Certified iOS Developer

Sep 2023

Apple

Foundational Swift and SwiftUI development practices.

PROJECTS

Host Calendar React Native Rewrite

Jan 2023 - Aug 2023

Tech Lead (iOS)

Co-led the rewrite of the Airbnb host calendar from native UIKit/View into shared React Native; lifted host-edit daily conversion 11% on Android with no measured regression on iOS.

Kotlin Multiplatform Now-Playing Module

Mar 2021 - Sep 2021

Lead Engineer

Built the KMP shared module for Now Playing on iOS and Android, removing 8,400 lines of duplicated code and standardizing playback analytics across both platforms.
